Price From: £4.25

Top of the range natural, handmade goats milk soaps enriched with Monoi de Tahiti, organic oils, Fair Trade butters and fragranced with aromatherapy grade essential oils.

These are our most luxurious goats milk soaps to date, with the richest creamy lather and fragranced with some of the most expensive essential oils. Each bar has been carefully formulated to contain organic botanical oils, Monoi de Tahiti and Fair Trade shea and cocoa butters. Like our other soaps they are handmade using a traditional cold-process manufacturing method using wooden moulds so they remain hard, but produce lots of creamy moisturising bubbles as a natural alternative to chemical laden body washes.

Each soap is co-ordinated to our skincare range, and has been wrapped in muslin cloth (which is large enough to be re-cycled and used as a face cloth). Our luxurious packaging is finished with an organza ribbon and outer label. More fragrances will be added to these top of the range natural goat's milk soaps, during 2009.

We use organic and Fair Trade ingredients in these soaps, including organic sustainable palm oil so these are Orangutan Friendly soaps!
